

## **Minot AFB Clandestine Nukes 'Oddities' --** **By Lori Price, [www.legitgov.org](http://www.legitgov.org) Updated: 19 Sep 2007**

**The following section was compiled by 'The Pundit.'**

Since the Minot story broke a week ago about the missing nuke clandestine operation from Minot, we have the following (for those who are paying attention):

1. All six people listed below are from Minot Airforce base
2. All were directly involved as loaders or as pilots
3. All are now dead
4. All within the last 7 days in 'accidents' [Not all of them --LRP]

Silly me, seeing more than there is to this story. I guess this is just another coincidence.

But no doubt now that there will be more coincidences in the near future because as I have stated before, you need about fourteen signatures to get an armed nuke onto a B-52, and they may have told their wives and friends.

**[Minot Base Officials Say Airman Dies While On Leave](#)** 12 Sep 2007 The Minot Air Force Base said an airman has died while on leave in Virginia. Airman First Class Todd Blue, who was 20 years old, died Monday while visiting with family members. The statement did not say how he died. The base said Blue was a response force member assigned to the 5th Security Forces Squadron. [The primary mission of the **[5th Security Forces Squadron](#)** is to 'provide 24-hour law enforcement and security services for the 5th Bomb Wing and all tenant units assigned to Minot AFB.'

**["Guardians of the Upper Realm"](#)** --The host wing on Minot Air Force Base, the 5th Bomb Wing operates the B-52H Stratofortress aircraft to provide global strike and combat-support capabilities to geographic commanders. **[B-52 Stratofortress -](#)**

**Mission** --Air Combat Command's B-52 is a long-range, heavy bomber that can perform a variety of missions... It can carry nuclear or precision guided conventional ordnance with worldwide precision navigation capability.]

**AF Secretary Visits MAFB** 14 Sep 2007 The top civilian in the Air Force spent the afternoon at Minot Air Force Base today. Michael Wynne, the Secretary of the Air Force, arrived at the base about 1 PM to get a personal look at how nuclear weapons are stored, protected, and handled. **His visit comes two weeks after a B-52 bomber loaded with six nuclear warheads was flown from Minot to Barksdale Air Force Base.**

**Staging Nukes for Iran?** By Larry Johnson 05 Sep 2007 My buddy... reminded me that the only times you put weapons on a plane is when they are on alert or if you are tasked to move the weapons to a specific site... Barksdale Air Force Base is being used as a jumping off point for Middle East operations... Why would we want to preposition nuclear weapons at a base conducting Middle East operations? His final point was to observe that someone on the inside obviously leaked the info that the planes were carrying nukes. A B-52 landing at Barksdale is a non-event. A B-52 landing with nukes. That is something else. Now maybe there is an innocent explanation for this? I can't think of one. What is certain is that the pilots of this plane did not just make a last minute decision to strap on some nukes and take them for a joy ride... Did someone at Barksdale try to indirectly warn the American people that the Bush Administration is staging nukes for Iran?
