

Chapter 5.4

Average means find the
mean, median & mode.
(all 3)

14)

16) hint: Some people like
to do more than one
thing.

19) Hint: Remember that the median is just the middle term. It may or may not be near the mean.

20) Find the total of all the interior angles. Remember to make the triangles then multiply the number of triangles by 180.(the number of degrees in a triangle.)
