

chapter 6.3

$$10a) \quad 7 + 91 = 98$$

$$b) \quad -4 + (-16) = -20$$

15 Find the sum of the matrices.

$$\begin{bmatrix} -4 & -16 & 10 \\ -22 & 9 & 16 \end{bmatrix} + \begin{bmatrix} -7 & 6 & -5 \\ -17 & 12 & -3 \end{bmatrix}$$

$$= \begin{bmatrix} -11 & -10 & 0 \\ 0 & 0 & 0 \end{bmatrix}$$
