

# Using Your Smart Phone to take pictures and Import them into ABF's Estimating Software.

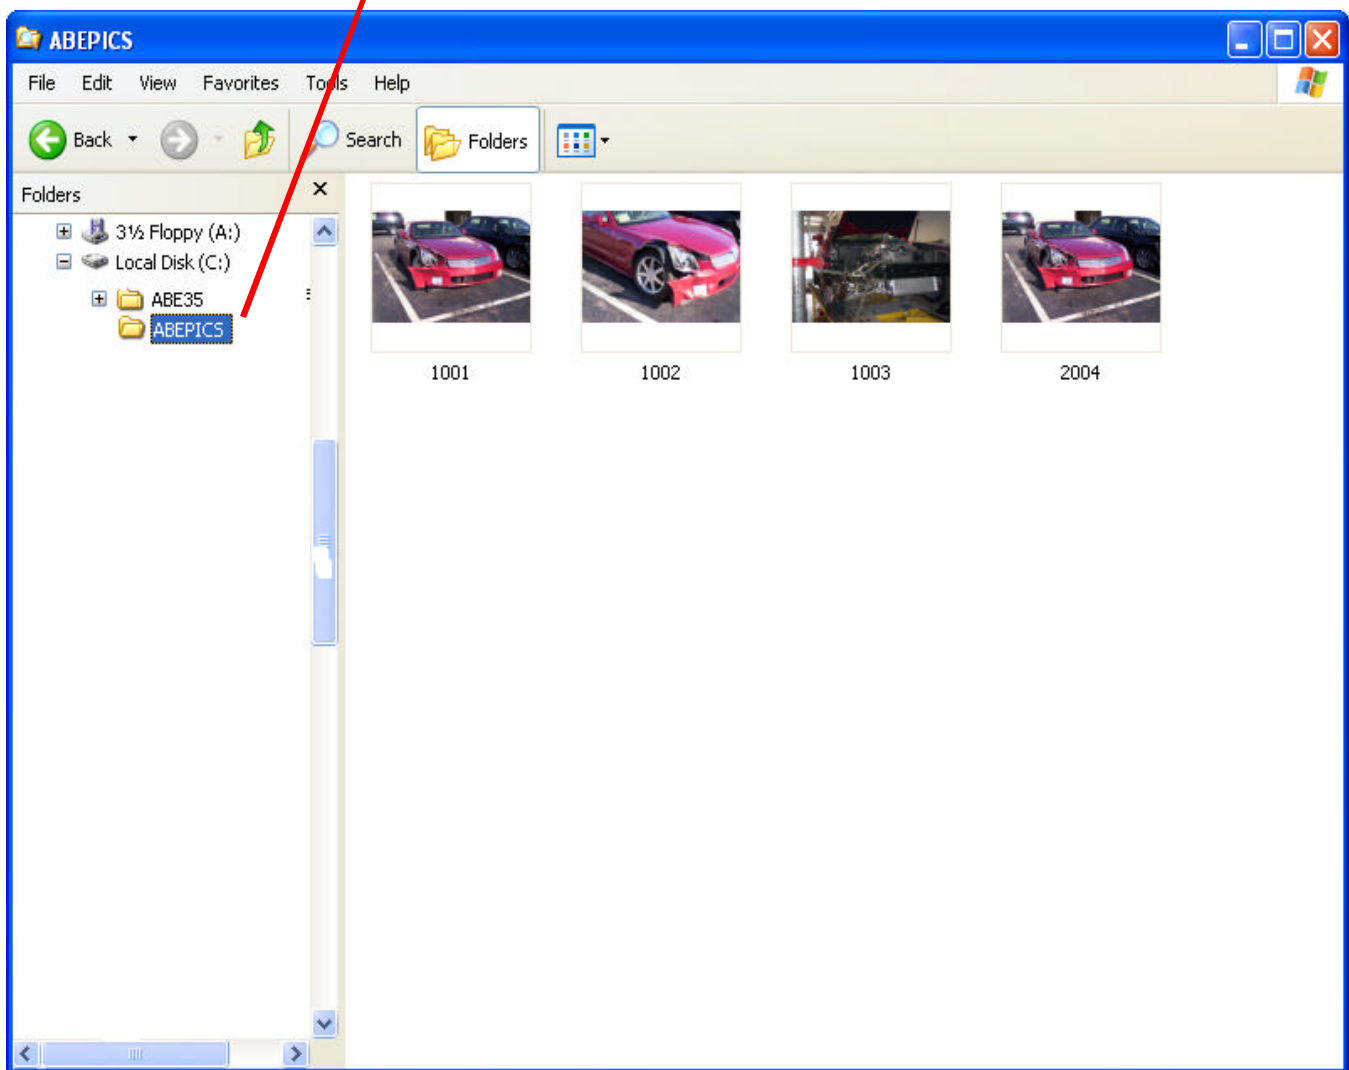

- 1) Create a smart phone picture folder on your Hard Drive C:
- 2) Set up the Import Path in the Auto Body Estimator digital Image Path Setup.
- 3) Take pictures with your smart phone and send them to your email address.
- 4) Open your email and download the pictures into the folder you created on your C: Drive.
- 5) Open the ABF Software and Import the pictures into the appropriate Damage Report.

*Please refer to the following pages for guidance.*

## Create a Smart Phone Pictures Folder

- 1) Create a Picture Holding Folder on your C: Drive This example is named ABEPICS.  
C:\ABEPICS

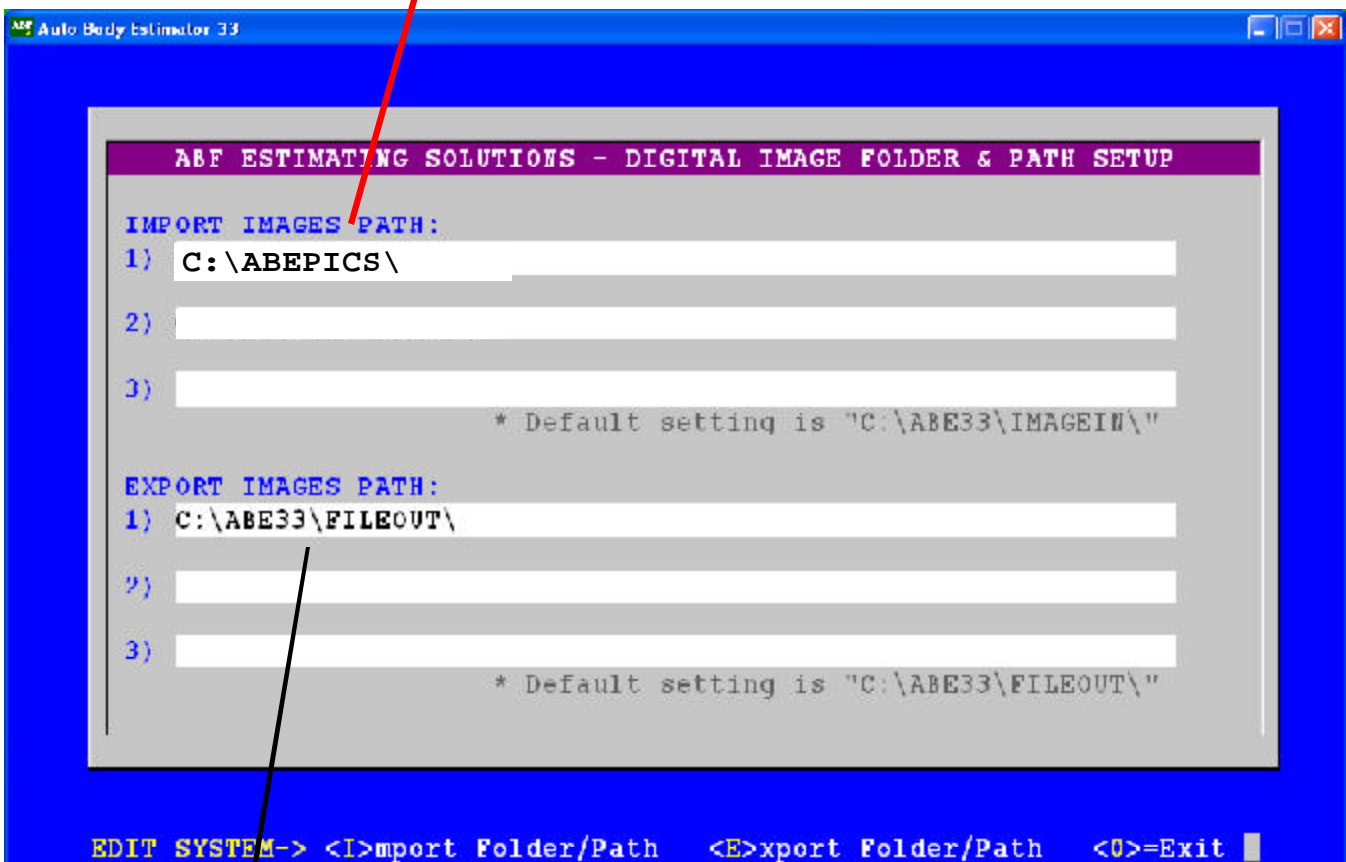

## Digital Image Folder/Path Setup

**At the Main Menu, Press the "S" Key.  
Then at the Setup Menu, Press the "D" key.**

Use the Digital Image Set-up screen to list the smart phone picture Hold Folder. Be sure you list the C: Drive and folder as shown in the example below (Including the "\" symbol at the end of the drive and folder name).

**Press the "I" Key to enter the drive and smart phone picture Hold Folder.**

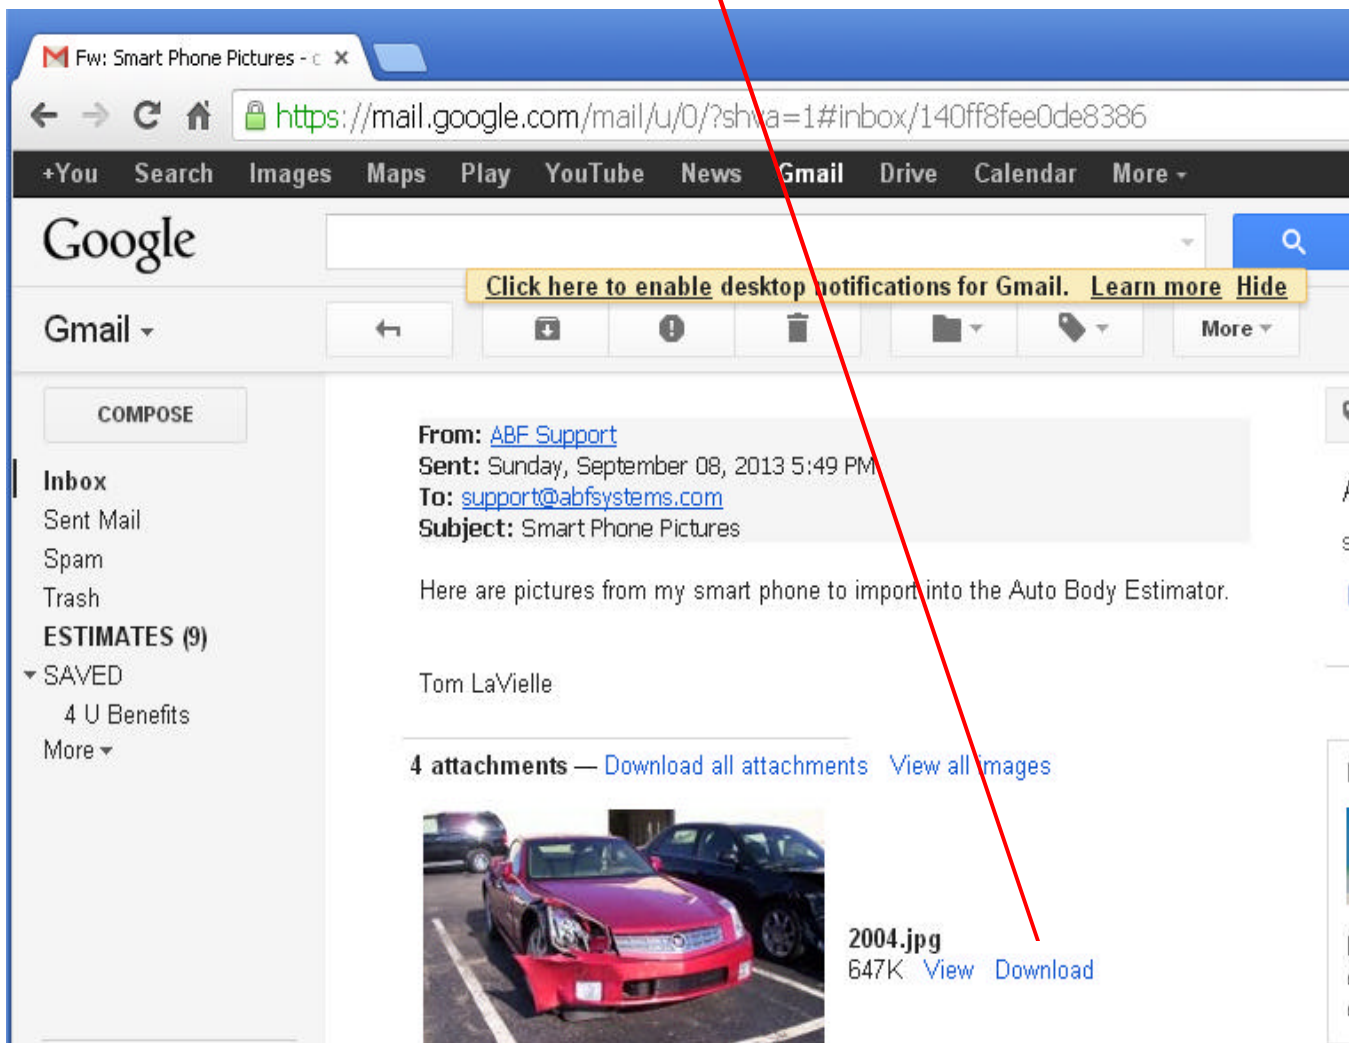

**Press the "E" Key to enter up to 3 different drives and folders to export digital images to. For example, a folder used to store digital images and / or store email photo attachments.**

## Download Your Smart Phone Pictures

**At the Main Menu, Press the "S" Key.  
Then at the Setup Menu, Press the "D" key.**

Use the Digital Image Set-up screen to list the smart phone picture Hold Folder. Be sure you list the C: Drive and folder as shown in the example below (Including the "\" symbol at the end of the drive and folder name).

**Press the "I" Key to enter the drive and smart phone picture Hold Folder.**

Now use the ABF Estimating software to import from the folder.
