## Key Terms – Week #3

**Abraham Maslow** (1908-1970) : psychologist who developed the theory of Hierarchy of Human Needs in 1943 (portrayed as a pyramid shaped structure that illustrates human needs, where self-actualization is the top of the pyramid). Not surprisingly, there is no clinical evidence to support his theory.

**Anthropology**: the study of mankind, its nature, behavior, origin, physical, social, and cultural development.

**Carl Rogers** (1902-1987): influential American psychologist who, along with Abraham Maslow, was the founder of the humanistic approach to psychology. Popularized the idea that "evil is not inherent in human nature" (i.e., people are basically good by nature).

**Dualistic**: Biblical view of man that he is comprised of both natural and supernatural elements, both flesh and spirit.

**Imago Dei**: Created in the image of God. Biblical perspective of man that we bear the divine image of God as his created beings (see Genesis 1:26). Though created in God's image, man is fallen by nature and in need of redemption.

**Imago Goo**: Del's way of expressing the humanistic perspective of man that maintains human beings are simply random products of the stuff in the box. Views man as monistic, good by nature, and in need of self-actualization.

**Monistic**: Humanistic and naturalistic view of man that man is simply material, made of one substance, and has no spiritual dimension. Man was not created but has evolved and is a product of chance. In religion monism is the view that all reality is one, such as in certain forms of Hinduism.

**Self-actualization**: Humanistic psychology theory that advocates getting in touch with one's inner-desires in order to help develop or achieve one's full potential.

**States of man**: May be referred to as "modes" of man. The different states through which man has passed or in which he currently exists: innocence, fallen, redeemed, and death (hell or glorified).
